

Mid-Town Beach Renourishment Project

	<p>View of sand being discharged from a point north of Wells Road.</p>	
--	---	--

	<p>Looking toward the north end of the nourishment project from the active placement area. As sand comes through the pipe, as a sand/water mixture, the sand stays on the beach and the water runs back into the ocean at the end of the sand dike made by the contractor. The north project limit is approximately Miraflores Drive.</p>
