

RESIDENTIAL DIRECT CONNECT ALARM

The Palm Beach Police Department is committed to using every resource at its command to assist the community. Direct Connect enhances your current alarm system to provide the quickest response possible!

HOW DOES IT WORK?

If your alarm is activated, your alarm monitoring company and the Palm Beach Police Department will be notified simultaneously! This will allow us to immediately dispatch a police officer – avoiding the delay between the time the alarm monitoring service is notified, confirms the emergency, and then calls the police department.

With the Direct Connect Alarm System the police department and your alarm company are notified at exactly the same time allowing the quickest response to your residence.

This system is designed to enhance and work in conjunction with your alarm system. In order to participate in DIRECT CONNECT ALARM SYSTEM, you must maintain your current alarm service. If your current alarm does not include a duplex reporting system or does not send the signal over a landline, your alarm company may charge you a one-time fee for installation of this feature.
