

TOWN OF PALM BEACH RETIREMENT SYSTEM

ACTUARIAL VALUATION REPORT AS OF
SEPTEMBER 30, 2022

ANNUAL EMPLOYER CONTRIBUTION FOR THE FISCAL YEAR
ENDING SEPTEMBER 30, 2024

February 21, 2023

Board of Trustees
Town of Palm Beach Retirement System
Palm Beach, Florida

**Re: Town of Palm Beach Retirement System
Actuarial Valuation as of September 30, 2022**

Dear Trustees:

The results of the September 30, 2022 Annual Actuarial Valuation of the Town of Palm Beach Retirement System are presented in this report. The Town of Palm Beach Retirement System is treated as three separate benefit groups: General Employees including Ocean Rescue, Police Officers and Firefighters.

This report was prepared at the request of the Board and is intended for use by the Retirement System and those designated or approved by the Board. This report may be provided to parties other than the System only in its entirety and only with the permission of the Board. GRS is not responsible for unauthorized use of this report.

The purpose of the valuation is to measure the System's funding progress and to determine the employer contribution rate for the fiscal year ending September 30, 2024. As requested, separate employer contribution rates have been prepared for General Employees including Ocean Rescue, Firefighters and Police Officers. This report should not be relied on for any purpose other than the purposes described herein. Determinations of financial results associated with the benefits described in this report, for purposes other than those identified above may be significantly different.

The contribution rate in this report is determined using the actuarial assumptions and methods disclosed in Section B of this report. This report includes risk metrics in Section A but does not include a more robust assessment of the risks of future experience not meeting the actuarial assumptions. Additional assessment of risks was outside the scope of this assignment.

This valuation assumed the continuing ability of the plan sponsor to make the contributions necessary to fund this plan. A determination regarding whether or not the plan sponsor is actually able to do so is outside our scope of expertise and was not performed.

The findings in this report are based on data and other information through September 30, 2022. The valuation was based upon information furnished by the Plan Administrator and the Town, concerning Retirement System benefits, financial transactions, plan provisions and active members, terminated members, retirees and beneficiaries. We checked for internal reasonability and year-to-year consistency, but did not audit the data. We are not responsible for the accuracy or completeness of the information provided by the Plan Administrator and the Town.

This report was prepared using certain assumptions approved by the Board as authorized under Florida Statutes and prescribed by the Florida Statutes as described in the section of this report entitled Actuarial

Assumptions and Cost Method. The investment return assumption was prescribed by the Board and the assumed mortality rates detailed in the Actuarial Assumptions and Cost Method section were prescribed by the Florida Statutes in accordance with Florida Statutes Chapter 112.63. All actuarial assumptions used in this report are reasonable for purposes of this valuation.

This report was prepared using our proprietary valuation model and related software which in our professional judgment has the capability to provide results that are consistent with the purposes of the valuation and has no material limitations or known weaknesses. We performed tests to ensure that the model reasonably represents that which is intended to be modeled.

This report has been prepared by actuaries who have substantial experience valuing public employee retirement systems. To the best of our knowledge the information contained in this report is accurate and fairly presents the actuarial position of the Town of Palm Beach Retirement System as of the valuation date. All calculations have been made in conformity with generally accepted actuarial principles and practices, with the Actuarial Standards of Practice issued by the Actuarial Standards Board and with applicable statutes.

Peter N. Strong and Jeffrey Amrose are members of the American Academy of Actuaries. These actuaries meet the Academy's Qualification Standards to render the actuarial opinions contained herein.

The signing actuaries are independent of the plan sponsor.

This actuarial valuation and/or cost determination was prepared and completed by us or under our direct supervision, and we acknowledge responsibility for the results. To the best of our knowledge, the results are complete and accurate. In our opinion, the techniques and assumptions used are reasonable, meet the requirements and intent of Part VII, Chapter 112, Florida Statutes, and are based on generally accepted actuarial principles and practices. There is no benefit or expense to be provided by the plan and/or paid from the plan's assets for which liabilities or current costs have not been established or otherwise taken into account in the valuation. All known events or trends which may require a material increase in plan costs or required contribution rates have been taken into account in the valuation.

Gabriel, Roeder, Smith & Company will be pleased to review this valuation report with the Board of Trustees and to answer any questions pertaining to the valuation.

Respectfully submitted,

GABRIEL, ROEDER, SMITH AND COMPANY

SECTION A

DISCUSSION OF VALUATION RESULTS

DISCUSSION OF VALUATION RESULTS

Comparison of Required Employer Contributions

The actuarially determined employer contribution (ADEC) developed in this year's valuation is compared below to the last valuation.

	For FYE 9/30/2024 Based on 9/30/2022 Valuation	For FYE 9/30/2023 Based on 9/30/2021 Valuation
General Employees - General		
Member Portion	3.50 %	3.50 %
Town Portion	32.27	33.20
Illustrative \$	\$ 3,935,841	\$ 3,604,043
General Employees - Ocean Rescue		
Member Portion	3.50 %	N/A %
Town Portion	239.45	N/A
Illustrative \$	\$ 208,398	\$ 188,616
General Employees - Aggregate		
Town Portion	33.74 %	34.94 %
Illustrative \$	\$ 4,144,239	\$ 3,792,659
Police Officers		
Member Portion	8.50 %	8.50 %
Town Portion	77.32	76.18
Illustrative \$	\$ 4,048,141	\$ 3,555,363
Firefighters		
Member Portion	8.50 %	8.50 %
Town Portion	76.80	76.41
Illustrative \$	\$ 4,844,779	\$ 4,470,167
Total for All Groups Reflecting Payments Made Evenly Throughout the Year		
Town Portion	54.71 %	55.30 %
Illustrative \$	\$ 13,037,159	\$ 11,818,189
Total if Contributed October 1st	\$ 12,650,878	\$ 11,457,243

Payment of Required Contribution

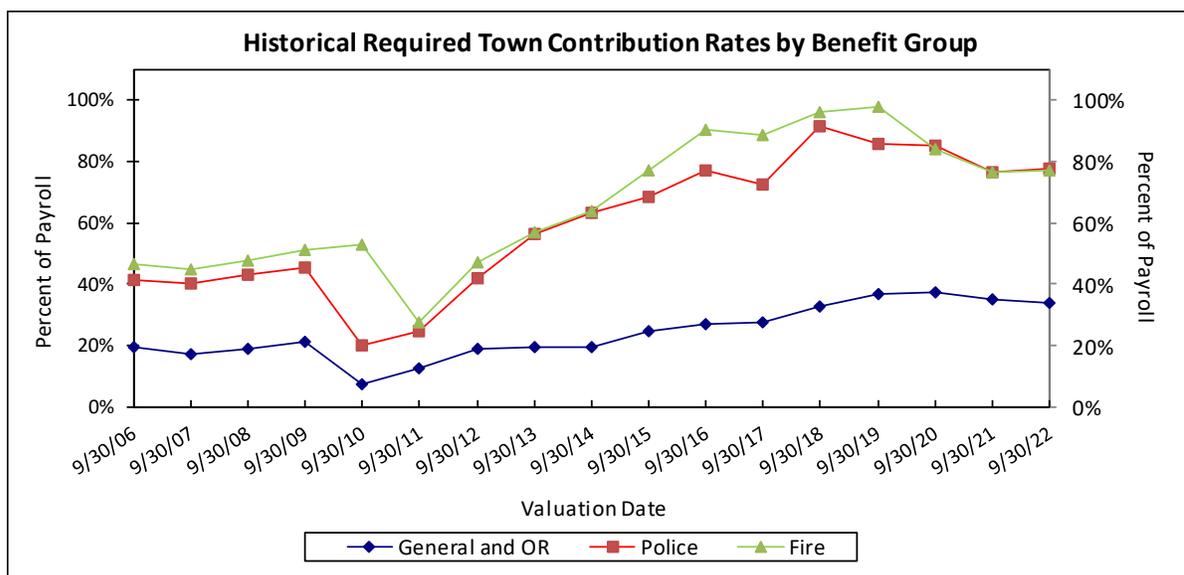

The required employer contribution rates developed in this valuation have been calculated as though the payments are evenly distributed throughout the year. If payments are made at the beginning of the year, the contribution rate for this year's valuation would be as outlined below.

	Contribution Rate	Illustrative Amount
General	31.31 %	\$ 3,819,225
Ocean Rescue	232.35	202,223
General Employees and Ocean Rescue	32.74	4,021,448
Police Officers	75.03	3,928,198
<u>Firefighters</u>	<u>74.52</u>	<u>4,701,232</u>
Total	53.09 %	\$ 12,650,878

For the fiscal year ending September 30, 2022, the Town contributed \$11,746,005 toward the ADEC as of the beginning of the fiscal year. This amount met the \$11,746,005 beginning-of-year ADEC requirement developed in the September 30, 2020 actuarial valuation report.

The Town also contributed an additional \$5.42 million shortly after the end of the fiscal year, in accordance with the Town's funding policy to make supplemental payments of \$5.42 million in excess of the required employer contribution each year until the plan becomes fully funded (subject to a \$16 million cap, indexed after 2017). This supplemental contribution was allocated between the benefit groups based on the amount of the Unfunded Actuarial Accrued Liability (UAAL) reported as of September 30, 2021 for each group. It was then applied towards reducing the UAAL amortization bases on a pro rata basis. The total Town contribution for the fiscal year of \$17,166,005 is broken down by group as follows:

	General Employees and Ocean Rescue	Police Officers	Firefighters	Total
Required (ADEC)	\$3,832,117	\$3,521,362	\$4,392,526	\$11,746,005
<u>Supplemental (Extra Payments Towards UAAL)</u>	<u>1,851,142</u>	<u>1,479,175</u>	<u>2,089,683</u>	<u>5,420,000</u>
Total Town Contributions	\$5,683,259	\$5,000,537	\$6,482,209	\$17,166,005

Revisions in Benefits

There were no benefit changes since the previous valuation.

Revisions in Actuarial Assumptions and Methods

The investment return assumption was reduced from 6.6% last year to 6.4%¹ as of September 30, 2022. The investment return assumption is scheduled to be reduced by 0.2% each year, until a target rate of 6.0% is reached as of September 30, 2024.

As a result of the assumption change described above, the aggregate required employer contribution for the fiscal year ending September 30, 2024 increased by \$668,096 and the Plan's aggregate UAAL increased by approximately \$8.03 million. The required employer contribution increased by 1.91% of covered payroll for General and Ocean Rescue, by 3.87% of covered payroll for Police Officers, and by 3.66% of covered payroll for Firefighters.

Actuarial Experience

The aggregate Plan experience during the year resulted in a net actuarial loss of \$6,904,667. The loss is mainly attributable to unfavorable investment experience.

Investment experience caused an actuarial loss of \$7,943,433. The investment return based on the aggregate Market Value of Assets was -15.55%, and the recognized investment return on the aggregate Actuarial Value of Assets was 3.68% this year (compared to the expected annual investment return of 6.6%). Investment gains and losses are spread over a five-year smoothing period, with gains and losses from prior years being smoothed into the current year.

Demographic experience resulted in a net actuarial gain for the year of \$1,038,766. The gain is mainly attributable to favorable retirement experience and higher mortality experience than expected among retired General Employees. There were a total of 5 retirements (or DROP entries) during the year versus 12 expected. Mortality experience among retired General Employees caused a net decrease in retiree payroll (net of survivor benefits now being paid to beneficiaries) of approximately \$293,000 versus an expected decrease of approximately \$168,000. These gains were partially offset by losses due to a higher than expected increase in the IRC Section 415(b) limit from 2022 to 2023 and higher than expected salary increases. Actual salary increases were 6.3% for General Employees, 10.2% for Police Officers, and 9.9% for Firefighters, compared to expected increases of 5.5% for General Employees and 6.0% for Police Officers and Firefighters.

The net actuarial experience loss caused the total required Town contribution to increase by approximately \$616,000.

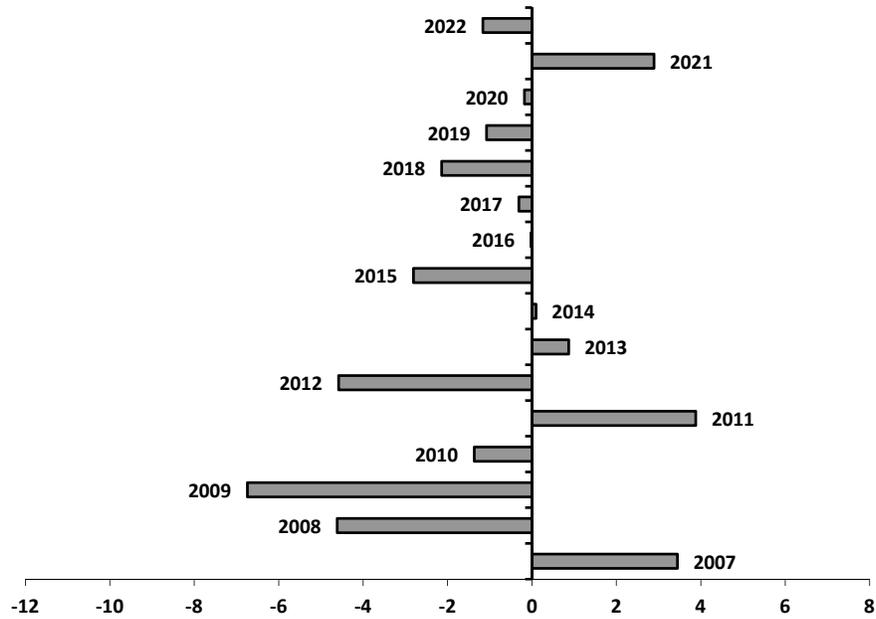

Year to year experience variations are expected and normal in the operation of a retirement system as members' demographic experience varies and economic conditions change. The expectation is that the positive and negative years will tend to cancel each other out over 15 to 20-year periods, as long as the actuarial assumptions used are reasonable. However, most of the last 15 years have been unfavorable.

¹ This assumption is forward-looking starting with the year beginning on the valuation date.

Funding Objective

The basic funding objective of the Retirement System is to avoid transfer of the cost of benefit obligations between generations of taxpayers. This objective is implemented by contributions sufficient to:

- Pay for costs allocated to the current year on account of service rendered by active non-DROP participants in the current year (Normal Cost).
- Pay for costs, in excess of the Funding Value of Assets, allocated to prior years on account of service rendered by participants in prior years (Unfunded Actuarial Accrued Liability) over closed periods of 15 to 20 years.

The annual actuarial valuation measures the relationship between Retirement System obligations and assets and determines the contribution rates for the ensuing year. The Retirement System is supported by member contributions, Town contributions, and investment income from Retirement System assets.

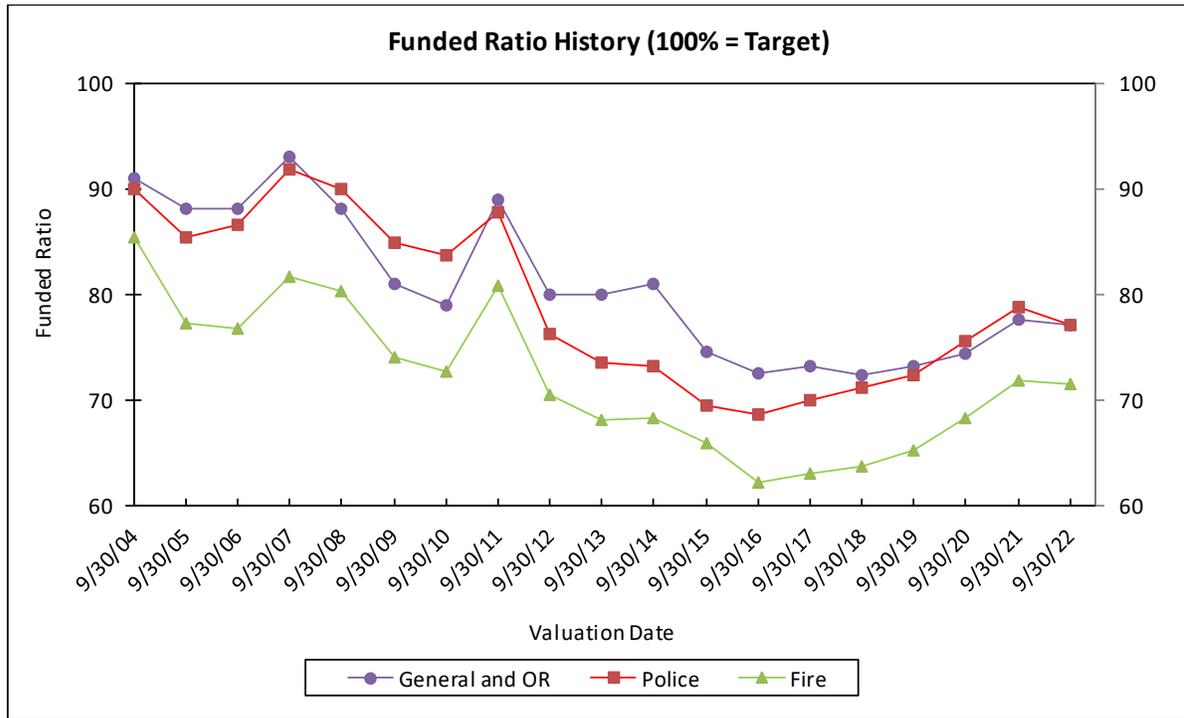

The Town adopted a Funding Policy effective in 2017 to make extra payments in excess of the required employer contribution of \$5.42 million toward the unfunded actuarial liability each year until the plan becomes fully funded. This is subject to an annual cap on the total employer contribution of \$16 million per year (indexed at 2.75% per year). Indexation from 2017 to 2023 puts the total employer contribution cap at \$18.83 million for 2023.

Funded Ratio

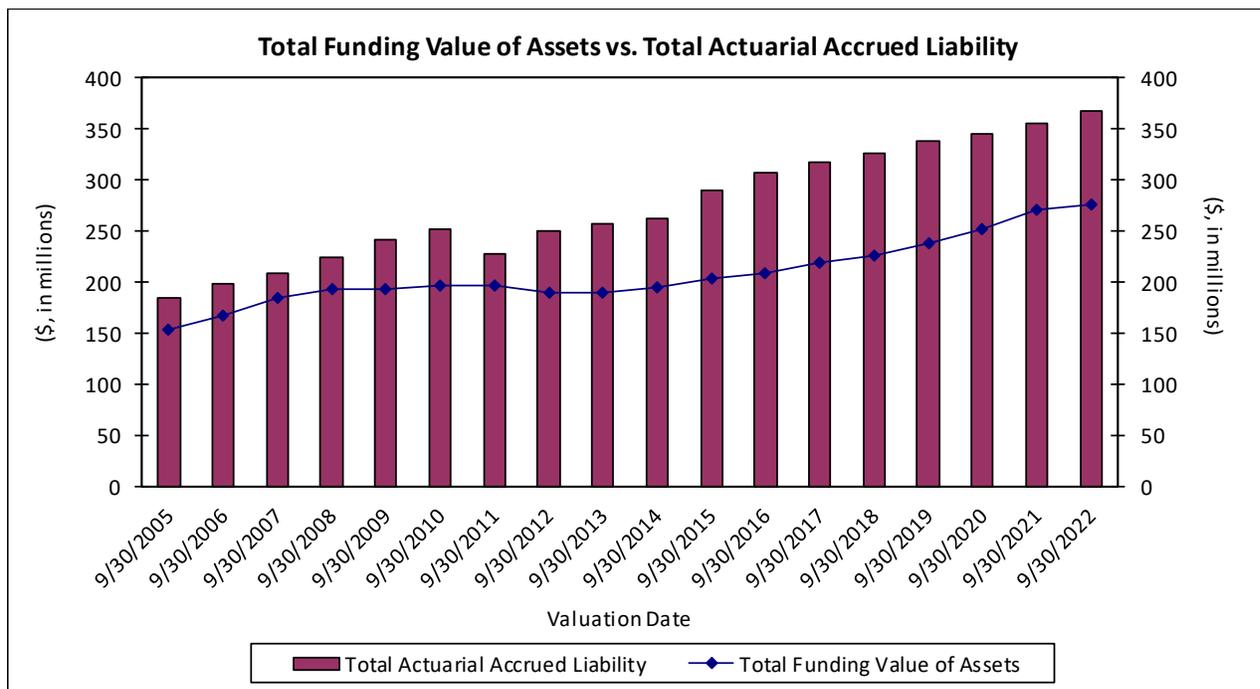

This year’s combined overall funded ratio for the Town of Palm Beach Retirement System is 75.2% compared to 76.1% last valuation. The combined overall funded ratio would have been 76.9% this year prior to reflecting the assumption changes. The funded ratios for each group are 77.1% for General and Ocean Rescue, 77.0% for Police Officers, and 71.5% for Firefighters, compared to 77.5%, 78.8%, and

71.9% respectively, in the previous valuation. Prior to reflecting the assumption changes, the funded ratios this year would have been 78.7%, 78.7%, and 73.1%, respectively. The funded ratio is equal to the actuarial value of assets divided by the actuarial accrued (past service) liability.

The following is a historical comparison of the total funding value of assets versus the total actuarial accrued liability.

Analysis of Retirement Plan Costs

The components of the change in the required contribution as a percent of payroll are as follows:

	General and Ocean Rescue	Police Officers	Firefighters
Town Contribution Rate Last Year	34.94 %	76.18 %	76.41 %
Experience (Gains) or Losses	0.85	5.71	3.37
Revision in Assumptions/Methods	1.91	3.87	3.66
Release of Prepaid Reserve	0.00	0.00	0.00
Extra Town Contribution Towards UAAL	(1.53)	(3.59)	(3.71)
Amortization Payment on UAAL	(2.51)	(5.05)	(2.96)
Normal Cost Rate	0.17	0.33	0.07
Administrative Expense	(0.09)	(0.13)	(0.04)
Member Contribution	0.00	0.00	0.00
Contribution Rate This Year	33.74 %	77.32 %	76.80 %

The change in the amortization payment on the UAAL as a percentage of payroll is mainly attributable to a higher than expected covered payroll as compared to the prior year. The payroll increased from the prior year for General Employees (including Ocean Rescue) by 13.16%, for Police Officers by 12.18%, and for Firefighters by 7.83%. The UAAL amortization payments are calculated to remain level as a percentage of payroll with an assumed payroll growth rate of 2.75%. If covered payroll increases by more than 2.75%, the amortization payment as a percent of covered payroll decreases (and vice versa).

Variability of Future Contribution Rates

The Actuarial Cost Method used to determine the required contribution is intended to produce contribution rates which are generally level as a percent of payroll. Even so, when experience differs from the assumptions, as it often does, the employer's contribution rate can vary significantly from year-to-year. Over time, if the year-to-year gains and losses offset each other, the contribution rate would be expected to return to the current level, but this does not always happen.

The total Actuarial Value of Assets exceeds the total Market Value of Assets by \$33,259,827 as of the valuation date (see Section C). This difference will be gradually recognized in the absence of offsetting gains, putting upward pressure on the contribution requirement. This is discussed in more detail in the next subsection.

In addition, the scheduled reductions in the investment return assumptions will continue to increase contribution requirements each year until the target investment return assumption of 6.0% is reached in the September 30, 2024 actuarial valuation.

For a more detailed analysis of expected future contribution requirements, please refer to the 10-year forecast of valuation results, which is expected to be completed under a separate cover later this month.

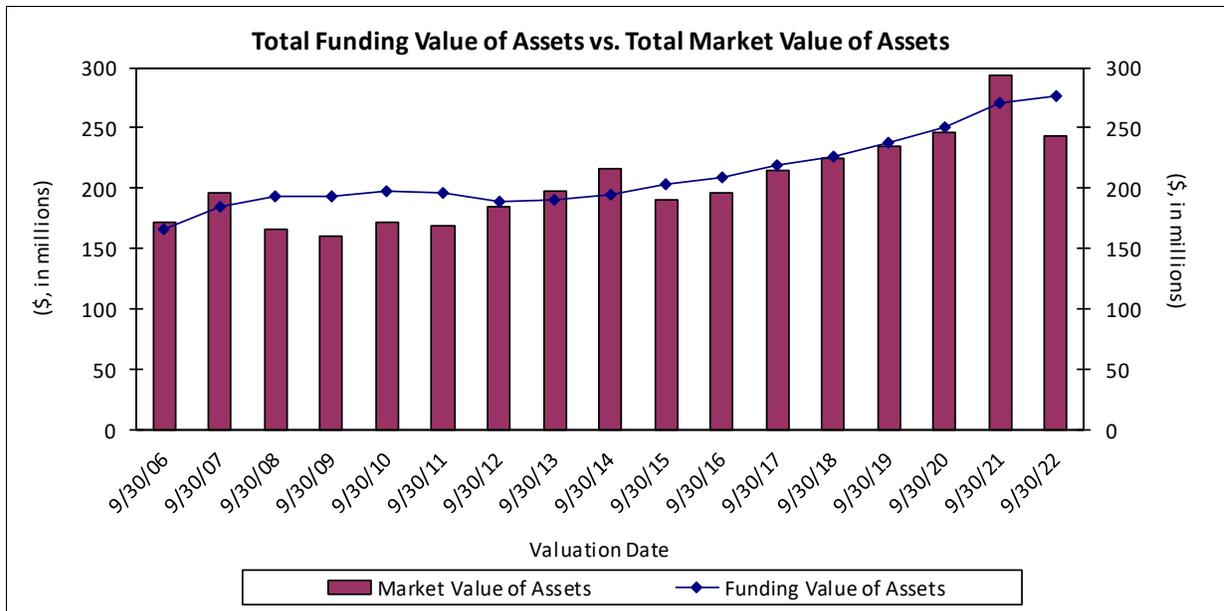

Relationship to Market Value

If Market Value had been the basis for the valuation, the contribution rate and funded ratio would have been:

	Contribution Rate	Funded Ratio
General Employees and Ocean Rescue	42.49 %	67.8 %
Police Officers	95.14	67.7
<u>Firefighters</u>	<u>91.37</u>	<u>62.9</u>
Total	67.00	66.1

The overall funded ratio on the market value basis last year was 82.4%.

Reserve Account Transfer

The Retirement Ordinance requires reserve account transfers from the Employer Reserve Fund to the Retirement Reserve Fund which will establish a match between assets allocated to the Retirement Fund and liabilities associated with current retired lives. The balances in the Retirement Reserve Fund as of September 30, 2022 following the transfers should be as follows:

<u>Division</u>	<u>Retirement Reserve Fund*</u>
General	\$97,514,111
Ocean Rescue	6,623,382
Police Officers	98,594,400
Firefighters	<u>100,081,500</u>
	\$302,813,393

* Includes current DROP members

Conclusion

The funded ratio for this Plan was over 100% as of September 30, 2000, whereas it is currently 75.2% (66.1% based on the Market Value of Assets). The decline in the funded ratio has mostly been caused by adverse overall investment experience since 10/1/2000. The average compound investment return on the Market Value of Assets from 10/1/2000 through 9/30/2022 was 4.5% versus an assumed rate of mostly 8.0% (7.5% to 6.6% in more recent years). Recent changes in assumptions (to the investment return assumption and the mortality rates) have also reduced the funded ratio, but to a much lesser extent than the investment experience.

Several steps have been taken to address the decline in funded status, such as extra Town contributions toward the UAAL, including planned annual \$5.42 million extra Town contributions starting in 2017 until the Plan becomes 100% funded, strengthening the actuarial assumptions, reductions in the current and future UAAL amortization periods to 15 or 20 years, reductions in the payroll growth rate assumption and scheduled future reductions in the investment return rate assumption. Some of these changes initially reduced the funded ratio, but they are expected to significantly strengthen the funded status of the Plan over the next 10 years.

The remainder of this Report includes detailed actuarial valuation results, information relating to the pension fund, financial accounting information, miscellaneous employee data and summaries of Plan provisions.

RISKS ASSOCIATED WITH THE MEASURING THE ACCRUED LIABILITY AND ACTUARIALLY DETERMINED CONTRIBUTION

The determination of the accrued liability and the actuarially determined contribution requires the use of assumptions regarding future economic and demographic experience. Risk measures, as illustrated in this report, are intended to aid in the understanding of the effects of future experience differing from the assumptions used in the course of the actuarial valuation. Risk measures may also help with illustrating the potential volatility in the accrued liability and the actuarially determined contribution that result from the differences between actual experience and the actuarial assumptions.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions due to changing conditions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period, or additional cost or contribution requirements based on the Plan's funded status); and changes in plan provisions or applicable law. The scope of an actuarial valuation does not include an analysis of the potential range of such future measurements.

Examples of risk that may reasonably be anticipated to significantly affect the plan's future financial condition include:

1. Investment risk – actual investment returns may differ from the expected returns;
2. Contribution risk – actual contributions may differ from expected future contributions. For example, actual contributions may not be made in accordance with the plan's funding policy or material changes may occur in the anticipated number of covered employees, covered payroll, or other relevant contribution base;
3. Salary and Payroll risk – actual salaries and total payroll may differ from expected, resulting in actual future accrued liability and contributions differing from expected;
4. Longevity risk – members may live longer or shorter than expected and receive pensions for a period of time other than assumed; and
5. Other demographic risks – members may terminate, retire or become disabled at times or with benefits other than assumed resulting in actual future accrued liability and contributions differing from expected.

The effects of certain trends in experience can generally be anticipated. For example, if the investment return since the most recent actuarial valuation is less (or more) than the assumed rate, the cost of the plan can be expected to increase (or decrease). Likewise, if longevity is improving (or worsening), increases (or decreases) in cost can be anticipated.

The computed contribution rate shown on page 1 may be considered as a minimum contribution rate that complies with the Board's funding policy. The timely receipt of the actuarially determined contributions is critical to support the financial health of the plan. Users of this report should be aware that contributions made at the actuarially determined rate do not necessarily guarantee benefit security.

Plan Maturity Measures

Risks facing a pension plan evolve over time. A young plan with virtually no investments and paying few benefits may experience little investment risk. An older plan with a large number of members in pay status and a significant trust may be much more exposed to investment risk. Generally accepted plan maturity measures include the following:

	<u>2022</u>	<u>2021</u>	<u>2020</u>
Ratio of the market value of assets to payroll	10.62	14.31	12.62
Ratio of actuarial accrued liability to payroll	16.05	17.37	17.74
Ratio of actives to retirees and beneficiaries	0.67	0.62	0.60
Ratio of net cash flow to market value of assets	(2.0%)	(1.2%)	(1.1%)

Ratio of Market Value of Assets to Payroll

The relationship between assets and payroll is a useful indicator of the potential volatility of contributions. For example, if the market value of assets is 2.0 times the payroll, a return on assets 5% different than assumed would equal 10% of payroll. A higher (lower) or increasing (decreasing) level of this maturity measure generally indicates a higher (lower) or increasing (decreasing) volatility in plan sponsor contributions as a percentage of payroll. We note that this ratio for the Town of Palm Beach (10.62) is higher than it is for most other plans we work with, which means the required contributions as a percentage of payroll are more volatile than most other plans.

Ratio of Actuarial Accrued Liability to Payroll

The relationship between actuarial accrued liability and payroll is a useful indicator of the potential volatility of contributions for a fully funded plan. A funding policy that targets a funded ratio of 100% is expected to result in the ratio of assets to payroll and the ratio of liability to payroll converging over time.

The ratio of liability to payroll may also be used as a measure of sensitivity of the liability itself. For example, if the actuarial accrued liability is 2.5 times the payroll, a change in liability 2% other than assumed would equal 5% of payroll. A higher (lower) or increasing (decreasing) level of this maturity measure generally indicates a higher (lower) or increasing (decreasing) volatility in liability (and also plan sponsor contributions) as a percentage of payroll. We note that this ratio for the Town of Palm Beach (16.05) is higher than it is for most of the plans we work with, which means the changes in liability and required contributions are more volatile than most other plans.

Ratio of Actives to Retirees and Beneficiaries

A young plan with many active members and few retirees will have a high ratio of active to retirees. A mature open plan may have close to the same number of actives to retirees resulting in a ratio near 1.0. A super-mature or closed plan may have significantly more retirees than actives resulting in a ratio below 1.0. This ratio for the Town of Palm Beach (0.67) is less than 1.0, indicating it is super-mature.

Ratio of Net Cash Flow to Market Value of Assets

A positive net cash flow means contributions exceed benefits and expenses. A negative cash flow means existing funds are being used to make payments. A certain amount of negative net cash flow is generally expected to occur when benefits are prefunded through a qualified trust. Large negative net cash flows as a percent of assets may indicate a super-mature plan or a need for additional contributions.

Amortization Schedule

The UAAL is being amortized as a level percent of pay over the number of years remaining in each amortization period. The following schedule illustrates the expected amortization of the UAAL*:

Amortization Schedule					
Year	Expected UAAL				
	Total	General	Ocean Rescue	Police Officers	Firefighters
2022	\$ 91,096,064	\$ 28,303,483	\$ 1,898,124	\$ 26,341,882	\$ 34,552,575
2023	87,086,595	27,322,142	1,816,008	24,916,793	33,031,652
2024	82,547,814	26,200,642	1,722,976	23,314,231	31,309,965
2025	77,441,344	24,928,437	1,618,267	21,521,529	29,373,111
2026	71,725,044	23,494,741	1,501,011	19,524,433	27,204,859
2027	66,272,146	21,885,464	1,370,146	18,230,415	24,786,121
2032	30,620,931	10,704,809	568,842	9,221,428	10,125,852
2037	7,853,125	3,024,131	116,931	2,039,256	2,672,807
2042	0	0	0	0	0

* This is a state-required schedule which shows how the UAAL is expected to be written down based on the amortization schedule as of the valuation date (assuming only the minimum required ADEC is contributed each year). This schedule does not reflect the Town's policy to make extra payments of \$5.42 million per year in excess of the ADEC until full funding is reached.

ACTUARIAL GAINS AND LOSSES

The assumptions used to anticipate mortality, employment turnover, investment income, expenses, salary increases, and other factors have been based on long range trends and expectations. Actual experience can vary from these expectations. The variance is measured by the gain and loss for the period involved. If significant long-term experience reveals consistent deviation from what has been expected and that deviation is expected to continue, the assumptions should be modified. The net actuarial gain (loss) for the past year is computed as follows:

	Total	General	Ocean Rescue	Police Officers	Firefighters
1. UAAL at start of year	\$ 85,333,977	\$ 27,399,615	\$ 1,745,277	\$ 23,288,545	\$ 32,900,540
2. Employer Normal Cost for Year	3,038,668	1,069,145	14,706	891,251	1,063,566
3. Employer Contributions toward ADEC (BOY)	11,746,005	3,636,738	195,379	3,521,362	4,392,526
4. Extra Town Contributions Towards UAAL at the End of the Year:					
a. For Release of Remaining Prepaid Reserve	0	0	0	0	0
b. Additional per Funding Policy	5,420,000	1,740,290	110,852	1,479,175	2,089,683
5. Interest at the Assumed Rate 0.066 x [(1) + 1/2*(2) - (3) - (4a)]	4,957,083	1,603,632	102,779	1,334,045	1,916,627
6. Expected UAAL Before Changes Revision: 1 + 2 - 3 - 4a - 4b + 5	76,163,723	24,695,364	1,556,531	20,513,304	29,398,524
7. Change in UAAL Due to Plan Amendments and/or Changes in Actuarial Assumptions	8,027,674	2,658,082	129,016	2,472,333	2,768,243
8. This Year's Expected UAAL (after changes):	84,191,397	27,353,446	1,685,547	22,985,637	32,166,767
9. This Year's Actual UAAL (after changes):	91,096,064	28,303,483	1,898,124	26,341,882	34,552,575
10. Net Actuarial Gain/(Loss):	(6,904,667)	(950,037)	(212,577)	(3,356,245)	(2,385,808)
11. Gain/(Loss) Due to Investments:	(7,943,433)	(2,737,886)	(142,293)	(2,541,956)	(2,521,298)
12. Gain/(Loss) Due to Other Sources:	1,038,766	1,787,849	(70,284)	(814,289)	135,490

The annual experience (gains)/losses in previous years have been as follows:

Year Ending	Experience (Gain) / Loss				
	Total	General	Ocean Rescue	Police Officers	Firefighters
9/30/2007	\$ (9,435,772)	\$ (3,267,590)	\$ (180,537)	\$ (2,937,297)	\$ (3,050,348)

The fund earnings and salary increase assumptions have considerable impact on the cost of the plan so it is important that they are in line with the actual experience. The following tables show the actual fund earnings and salary increase rates compared to the assumed rates for the last few years:

Year Ending	Investment Return			Assumed
	Actual Actuarial Rate of Return			
	<u>General and Ocean Rescue</u>	<u>Police Officers</u>	<u>Firefighters</u>	
9/30/2004	4.9 %	4.8 %	4.8 %	8.00 %
9/30/2005	5.9	5.5	5.4	8.00
9/30/2006	8.3	8.4	8.4	8.00
9/30/2007	11.2	11.5	11.3	8.00
9/30/2008	1.9	6.0	5.3	8.00
9/30/2009	(1.2)	3.9	1.5	8.00
9/30/2010	2.9	3.2	3.0	8.00
9/30/2011	1.7	1.6	1.3	8.00
9/30/2012	1.9	0.9	0.9	7.50
9/30/2013	7.7	5.1	5.7	7.50
9/30/2014	8.5	7.1	7.2	7.50
9/30/2015	6.2	5.3	5.2	7.50

Average	4.5 %	5.6 %	4.1 %	5.9 %	5.3 %	6.1 %	6.0 %	6.1 %

*Based on members who were active throughout the year.

Salaries for the year ended 9/30/2016 included 27 pay periods rather than the standard 26. Salaries for the year ended 9/30/2017 included 26 pay periods, so the true annualized salary increases for the year ended 9/30/2017 are understated.

The actual investment return rates shown on the previous page are based on the actuarial value of assets. These returns differ from the returns on the market value of assets due to the smoothing of investment gains and losses over a five-year period. Please see page 65 for a full comparison of market value versus actuarial value (funding) rates of return. The actual salary increase rates shown above are the increases received by those active members who were included in the actuarial valuations both at the beginning and end of each period.

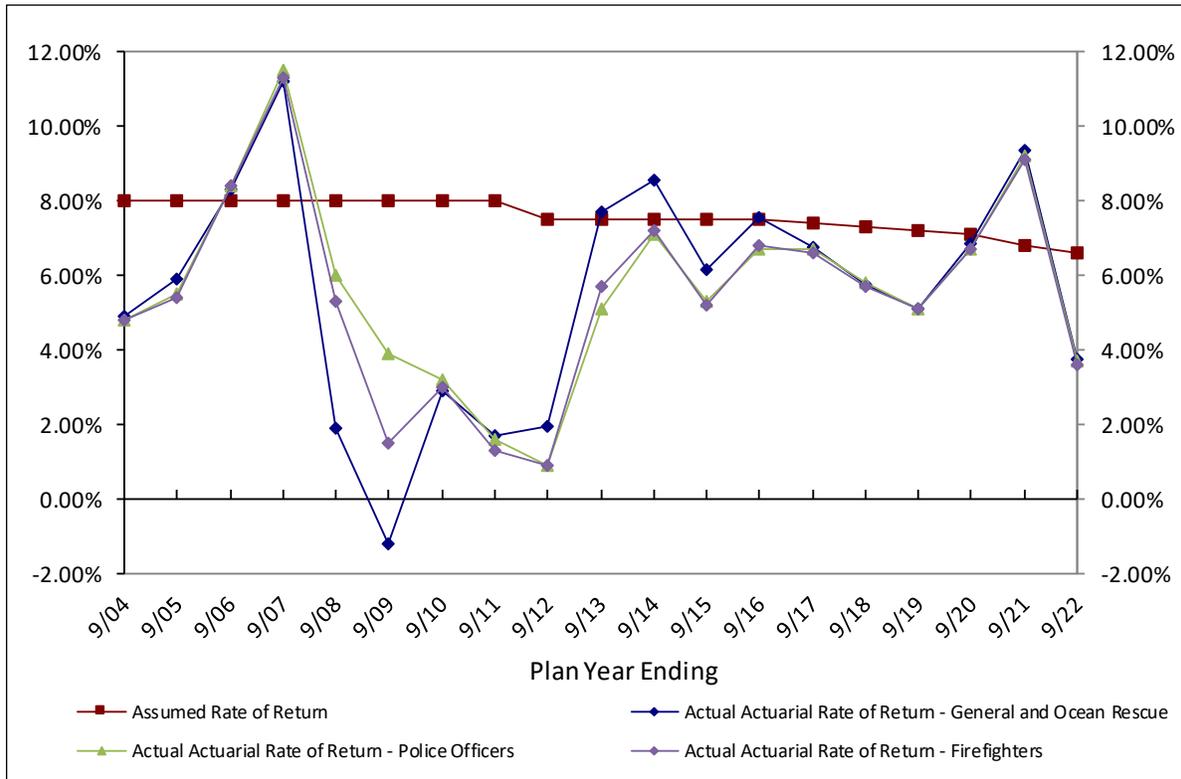

A schedule of recent total payroll change experience, as measured by gross pay, follows:

	Year Ended September 30					Average 10-Year#
	2022	2021	2020	2019	2018	
% Change in Total Payroll						
General	12.4	2.6	2.1	(3.9)	(5.2)	1.9 %
Ocean Rescue	N/A	N/A	(100.0)	8.2	(10.9)	(8.4)
Police Officers	12.2	9.1	(2.9)	17.5	(6.8)	1.7
Firefighters	7.8	7.9	17.0	7.2	11.0	4.0

With the adoption of new economic assumptions, consultation with the Town on its budgeted payroll projections, and the Town's policy of contributing on a projected dollar basis using 2.75% wage inflation, this report uses 2.75% inflation for purposes of compliance with F.S. 112.64(5).

Funding Progress Indicators

We believe an understanding of funding progress and status can be achieved using the following measures:

Indicator (1) **The actuarial present value of gains or losses realized in the operation of the Retirement System** - an experience indicator. Gains and losses are expected to cancel each other over a period of years (in the absence of double-digit inflation) but sizable year-to-year fluctuations are common. An experience gain can result from assets increasing in value by more than anticipated by the funding program, or by the actuarial accrued liability increasing by less than anticipated by the funding program, or by other favorable combinations of deviation from expected asset and liability changes.

Indicator (2) **The ratio of the funding value of assets to the actuarial accrued liability** measured in accordance with GASB Statement No. 5 prior to the September 30, 1997 valuation and GASB Statement No. 25 beginning with the September 30, 1997 valuation. The ratio is expected to increase over time, but the basic trend may be interrupted by benefit improvements or changes in actuarial assumptions and/or methods.

Indicator (3) **The ratio of the unfunded actuarial accrued liability to active member payroll** - an inflation adjusted funding level indicator. In a soundly financed Retirement System, the amount of the unfunded actuarial accrued liability will be controlled and prevented from increasing in the absence of benefit improvements. However, in an inflationary environment it is seldom practical to impose this control on dollar amounts which are depreciating in value. The ratio is a relative index of condition where inflation is present in both items. The ratio is expected to decrease over time but the basic trend may be interrupted by benefit improvements.

16/17	2015	23.61	109.09	68.42	77.00
17/18	2016	26.04	104.54	76.87	89.93
18/19	2017	26.65	108.26	72.67	88.65
19/20 (a)	2018	31.46	138.63	91.09	95.89
20/21 (a)	2019	35.55	131.39	85.74	97.44
21/22 (a)	2020	35.49	N/A *	84.97	83.66
22/23 (a)	2021	33.20	N/A *	76.18	76.41
23/24 (b)	2022	30.41	230.56	73.45	73.14
23/24 (a)	2022	32.27	239.45	77.32	76.80

(a) After changes in benefit provisions and/or actuarial assumptions and/or actuarial cost methods.

(b) Before changes described in benefit provisions and/or actuarial assumptions and/or actuarial cost methods.

* There were no active Ocean Rescue employees as of the valuation date.

ACTUARIAL ASSUMPTIONS AND COST METHOD

Funding objective contribution requirements and actuarial present values are calculated by applying estimates of future Plan activities (actuarial assumptions) to the benefit provisions and people information of the System, using the actuarial cost method described on the following page.

The principal areas of activity which require assumptions are:

- long-term rates of investment return to be generated by the assets of the System
- patterns of pay increases to members
- rates of mortality among members, retirees and beneficiaries
- rates of withdrawal of active members
- rates of disability among active members
- the age patterns of actual retirement

In a valuation, the monetary effect of each activity is calculated for as long as a present covered person survives – a period of time which can be as long as a century.

Actual activities of the system will not coincide exactly with assumed activities due to the nature of the activities. Each valuation provides a complete recalculation of assumed future activities and takes into account the effect of differences between assumed and actual activities to date. The result is a continual series of adjustments (usually small) to the computed contribution rate.

From time-to-time one or more of the assumptions are modified to reflect experience trends (but not random or temporary year-to-year fluctuations).

Actuarial Assumptions are established by the Board after consulting with the actuary. The reasonableness of the economic assumptions is based upon capital market expectations provided by various investment consultants and other sources such as the Social Security Trustees report. All actuarial assumptions are based on future expectations, not market measures.

These assumptions are used, in combination with the other assumptions, to (i) determine the present value of amounts expected to be paid in the future and (ii) establish rates of contribution which are expected to remain relatively level as a percent of active member payroll.

Valuation Methods

Actuarial Cost Method - Normal cost and the allocation of benefit values between service rendered before and after the valuation date were determined using an **Individual Entry-Age Actuarial Cost Method** having the following characteristics:

- (i) the annual normal cost for each individual active member, payable from the date of employment to the dates of expected retirement, is sufficient to accumulate the value of the member's benefit at the time of retirement;
- (ii) each annual normal cost is a constant percentage of the member's year by year projected covered pay.

Actuarial gains/(losses), as they occur, reduce (increase) the Unfunded Actuarial Accrued Liability.

Financing of Unfunded Actuarial Accrued Liabilities - Unfunded Actuarial Accrued Liabilities were amortized as a level (principal & interest combined) percent of payroll over a prescribed period of up to 20 years for assumption or method changes and up to 15 years for plan changes or experience gains or losses (hybrid amortization policy). The payroll growth assumption is 2.75% for purposes of compliance with F.S. 112.64(5).

Funding Value of Assets - The Funding Value of Assets phases in the difference between the expected investment earnings and actual investment earnings at the rate of 20% per year. The Funding Value of Assets will be further adjusted to the extent necessary to fall within the corridor whose lower limit is 80% of the Market Value of plan assets and whose upper limit is 120% of the Market Value of plan assets. During periods when investment performance exceeds the assumed rate, the Funding Value of Assets will tend to be less than the Market Value. During periods when investment performance is less than assumed rate, the Funding Value of Assets will tend to be greater than the Market Value.

Valuation Assumptions

The actuarial assumptions used in the valuation are shown in this Section. The active group is too small to provide statistically significant experience on which to base certain demographic assumptions. Mortality is based on a commonly used fully generational table and projection scale that is mandated by Florida Statutes.

Economic Assumptions

The investment return rate assumed in the valuation is 6.40% per year, compounded annually (net after investment expenses). The investment return assumption was 6.60% in the prior valuation. The investment return assumption is scheduled to be reduced by 0.2% each year, until a target rate of 6.0% is reached as of September 30, 2024.

The **Inflation Rate** assumed in this valuation was 2.25% per year. This is the rate at which growth in the supply of money and credit is assumed to exceed growth in the supply of goods and services. It may be thought of as the rate of depreciation of the purchasing power of the dollar. There are a number of indices for measuring the inflation rate. The recent inflation rate, as measured by the Consumer Price Index, has been:

	Year Ended September 30					Average for Period
	2022	2021	2020	2019	2018	
Actual	8.2%	5.4%	1.4%	1.7%	2.3%	3.8%
Assumed	2.25%	2.25%	2.5%	2.5%	2.5%	2.4%

The assumed **real rate of return** over inflation is defined to be the portion of total investment return that is more than the assumed inflation rate. This is the rate of return assumed to be produced by investing a pool of assets in an inflation-free environment. Considering other economic assumptions, the 6.4% investment return rate translates to an assumed real rate of return over inflation of 4.15%.

The active member population is assumed to remain constant.

The rate of salary increase used for individual members is 5.5% per year for General and Ocean Rescue members and 6.0% per year for Police Officers and Firefighters. Part of this assumption is for merit and/or seniority increases and productivity increases, and 2.25% recognizes price inflation. This assumption is used to project a member’s current salary to the salaries upon which benefits will be based.

Demographic Assumptions

The mortality table is the PUB-2010 Headcount Weighted Employee Mortality Table (for pre-retirement mortality) and the PUB-2010 Headcount Weighted Healthy Retiree Mortality Table (for postretirement mortality), with separate rates of males and females and mortality improvements projected to all future years after 2010 using Scale MP-2018. For General Employees, the mortality tables are based on the General Below-Median versions of the given table and male ages set back one year. For Ocean Rescue, Police Officers and Firefighters, the mortality tables are based on the Safety versions of the given table for females and Safety Below-Median versions of the given table for males, with male and female ages set forward 1 year. These are the same rates as used for Regular (other than K-12 School Instructional Personnel) and Special Risk Class members of the Florida Retirement System (FRS) in their July 1, 2021 Actuarial Valuation. Florida Statutes Chapter 112.63(1)(f) mandates the use of the mortality tables used in either of the two most recently published actuarial valuation reports of FRS.

Healthy Post-Retirement Mortality

General Employees				
Sample Ages in 2022	Value of \$1 Monthly for Life		Future Life Expectancy (Years)	
	Men	Women	Men	Women
	50	\$157.24	\$164.95	33.24
55	149.31	159.14	28.87	32.59
60	140.56	150.87	24.77	28.04
65	129.30	139.54	20.70	23.46
70	114.76	124.96	16.68	18.98
75	98.00	107.69	12.97	14.79
80	79.96	88.42	9.68	11.03

Ocean Rescue, Police Officers and Firefighters				
Sample Ages in 2022	Value of \$1 Monthly for Life		Future Life Expectancy (Years)	
	Men	Women	Men	Women
	50	\$158.82	\$165.81	32.59
55	149.26	157.16	27.82	31.39
60	137.44	146.76	23.23	26.59
65	123.74	134.41	18.95	22.07
70	107.44	119.72	14.93	17.81
75	89.44	102.79	11.32	13.88
80	70.79	84.50	8.24	10.41

This assumption is used to measure the probabilities of each benefit payment being made after retirement.

Healthy Pre-Retirement Mortality

General Employees				
Sample Ages in 2022	Value of		Future Life	
	\$1 Monthly for Life		Expectancy (Years)	
	Men	Women	Men	Women
50	\$168.88	\$173.26	37.80	40.34
55	161.35	166.59	32.79	35.21
60	151.94	158.00	27.93	30.18
65	140.26	146.86	23.24	25.25
70	125.43	132.37	18.68	20.43
75	106.42	113.75	14.24	15.74
80	82.04	89.97	9.94	11.23

Ocean Rescue, Police Officers and Firefighters				
Sample Ages in 2022	Value of		Future Life	
	\$1 Monthly for Life		Expectancy (Years)	
	Men	Women	Men	Women
50	\$166.77	\$172.82	35.74	39.66
55	158.09	165.92	30.66	34.51
60	146.97	156.84	25.70	29.44
65	133.04	144.74	20.93	24.42
70	115.92	128.92	16.40	19.51
75	95.32	108.97	12.16	14.81
80	70.79	84.50	8.24	10.41

This assumption is used to measure the probabilities of active members dying prior to retirement.

For disabled retirees, the mortality table used for General Employees is the PUB-2010 Headcount Weighted General Disabled Retiree Table with ages set forward 3 years for males and females, with no provision being made for future mortality improvements. The mortality table used for Ocean Rescue, Police Officers and Firefighters is 80% of the PUB-2010 Headcount Weighted General Disabled Retiree Mortality Table, and 20% of the PUB-2010 Headcount Weighted Safety Disabled Retiree Mortality Table, both with separate rates for males and females, with no provision being made for future mortality improvements. These are the same rates as used for Regular and Special Risk Class members of the Florida Retirement System (FRS) in their July 1, 2021 Actuarial Valuation.

The rates of retirement used to measure the probability of eligible members retiring during the next year were as follows:

Retirement Ages	Percent Retiring		Early Retirement Ages	Percent Retiring General	Year of Normal Retirement Eligibility	Percent Retiring Police & Firefighters
	General	Ocean Rescue				
62	30%	70%	60 - 61	5%	1	70%
63	15	80			2	70%
64	15	90			3	70%
65	60	100			4	70%
66	30				5	100%
67	40					
68	50					
69	90					
70	100					

Rates of separation from active membership were as shown below (rates do not apply to members eligible to retire and do not include separation on account of death or disability). This assumption measures the probabilities of members separating from employment.

Sample Ages	Percent Separating Within Next Year			Percent Separating Within Next Year	
	Years of Service	General	Police and Firefighters	Years of Service	Ocean Rescue
ALL	0	40.00 %	15.00 %	0	20.00 %
	1	25.00	10.00	1	17.50
	2	15.00	8.00	2	15.00
	3	10.00	7.00	3	12.50
	4	7.00	6.00	4	10.00
20	5 & Over	6.00	5.00	5	9.00
25		6.00	5.00	6	8.00
30		5.50	4.50	7	7.00
35		4.40	3.55	8	6.00
40		1.85	1.45	9	5.00
45		1.25	0.75	10	4.00
50		1.25	0.75	11	3.00
55		1.25	0.75	12	2.00
60		1.25	0.75	13 & Over	2.00

Note: Frozen plan A benefits are valued assuming 10% separation per year after the first 4 years, to better model the earlier benefit commencement eligibility applicable to Plan A benefits. In addition, plan A benefits for Police officers are not expected to be deferred past age 50.

Rates of disability measure the probabilities of active members becoming disabled. For General Employees 25% of disabilities are assumed to be service-connected. For Ocean Rescue and Police Officers, 50% of disabilities are assumed to be service-connected. For Firefighters, 75% of disabilities are assumed to be service-connected.

Sample Ages	Percent Becoming Disabled	
	Within Next Year	
	Men	Women
20	0.07 %	0.03 %
25	0.09	0.05
30	0.10	0.07
35	0.14	0.13
40	0.21	0.19
45	0.32	0.28
50	0.52	0.45
55	0.92	0.76
60	1.53	1.10
65	1.65	0.98

Changes from the previous valuation

- The assumed investment return was lowered from 6.6% to 6.4% per year, compounded annually, net after investment expenses. The investment return assumption is scheduled to be reduced by 0.2% each year, until a target rate of 6.0% is reached as of September 30, 2024.

Miscellaneous and Technical Assumptions

Administrative & Investment Expenses	Administrative expenses are reimbursed on a retrospective basis by an addition to the Town contribution rate. Investment expenses are an offset against total investment income. Assumed administrative expenses are added to the Normal Cost.
Benefit Service	Exact fractional service is used to determine the amount of benefit payable.
Decrement Operation	Disability and mortality decrements do not operate during the first 5 years of service. Disability and withdrawal do not operate during retirement eligibility.
Decrement Relativity	Decrement rates are used directly, without adjustment for multiple decrement table effects.
Decrement Timing	Decrements of all types are assumed to occur at the middle of the year.
Earnings	Earnings reported for the actuarial valuation include all amounts included in average earnings for benefit purposes.
Eligibility Testing	Eligibility for benefits is determined based upon the age nearest birthday and service nearest whole year on the date the decrement is assumed to occur.
Forfeitures	For vested separations from service, it is assumed that members separating will only withdraw their contributions and forfeit an employer financed benefit if the value of their accumulated contributions exceeds the present value of their deferred monthly benefit. It was further assumed that the liability at termination is the greater of the vested deferred benefit (if any) or the member's accumulated contributions.
Internal Revenue Code (IRC) Section 415 Limitation	IRC Section 415 limits are projected into the future assuming annual inflation increases of 2.0% per year and no changes in the applicable prescribed mortality assumptions. For the purpose of valuing the liability for applicable Plan members whose benefits are currently limited under IRC Section 415 and who are currently in the DROP, payments and interest in the DROP balance continue to accumulate until the DROP exit date. The assumed DROP participation period is 10 years for a Police Officer who is appointed Town Manager and 5 years (the maximum allowable) for all other members. Benefits payable from the Plan are then reduced to reflect the projected IRC Section 415 limit and the value of the projected DROP exit balance. Investment earnings in the DROP are being projected at an assumed rate of 6.5% for this purpose.

Incidence of Contributions	Employer contributions and Member contributions are assumed to be received continuously throughout the year based upon the computed percentages of payroll shown in this report, and the actual payroll payable at the time contributions are made. New entrant normal cost contributions are applied to the funding of new entrant benefits.
Lump Sum Payments	Lump sum payments for unused accumulated leave time are excluded in determining pension amounts pursuant to the Town of Palm Beach Code of Ordinances.
Marriage Assumption	90% of males and 90% of females are assumed to be married for purposes of death-in-service benefits. Males are assumed to be three years older than their spouses for active member valuation purposes.
Member Contributions	Member contributions are based upon the percentages of payroll shown in this report.
Normal Form of Benefit	The assumed normal form of benefit is the straight life form for Plan B benefits, and 75% joint and survivor (with 10 years certain) for Plan A benefits.
Option Factors	Actuarially reduced Plan B benefits use the RP-2000 Mortality Table with a 7.50% interest rate assumption.
Pay Increase Timing	Beginning of (Fiscal) year. This is equivalent to assuming that reported pays represent amounts paid to members during the year ended on the valuation date.
Service Credit Accruals	It is assumed that members accrue one year of service credit per year.

GLOSSARY

Accrued Service	Service credited under the System which was rendered before the date of the actuarial valuation.
Actuarial Accrued Liability (AAL)	The difference between the Actuarial Present Value of Future Benefits, and the Actuarial Present Value of Future Normal Costs. Also referred to as "Accrued Liability" or "Past Service Liability."
Actuarial Assumptions	Assumptions about future plan experience that affect costs or liabilities, such as: mortality, withdrawal, disablement, and retirement; future increases in salary; future rates of investment earnings; future investment and administrative expenses; characteristics of members not specified in the data, such as marital status; characteristics of future members; future elections made by members; and other items.
Actuarial Cost Method	A mathematical budgeting procedure for allocating the Actuarial Present Value of Future Benefits between the Actuarial Present Value of Future Normal Costs and the Actuarial Accrued Liability. Sometimes referred to as the "Actuarial Valuation Cost Method."
Actuarial Equivalent	Of equal Actuarial Present Value, determined as of a given date and based on a given set of Actuarial Assumptions.
Actuarial Present Value (APV)	The amount of funds required to provide a payment or series of payments in the future. It is determined by discounting the future payments with an assumed interest rate and with the assumed probability each payment will be made. Also referred to as "Present Value."
Actuarial Present Value of Future Benefits (APVFB)	The Actuarial Present Value of amounts which are expected to be paid at various future times to active members, retired members, beneficiaries receiving benefits, and inactive, nonretired members entitled to either a refund or a future retirement benefit. Expressed another way, it is the value that would have to be invested on the valuation date so that the amount invested plus investment earnings would provide sufficient assets to pay all projected benefits and expenses when due.
Actuarial Valuation	The determination, as of a valuation date, of the Normal Cost, Actuarial Accrued Liability, Actuarial Value of Assets, and related Actuarial Present Values for a plan. An Actuarial Valuation for a governmental retirement system typically also includes calculations of items needed for compliance with GASB, such as the Funded Ratio and the Actuarially Determined Contribution (ADC).

Actuarially Determined Contribution (ADC)	The employer’s periodic required contributions, expressed as a dollar amount or a percentage of covered plan compensation, determined under GASB. The ADC consists of the Employer Normal Cost and Amortization Payment.
Amortization Method	A method for determining the Amortization Payment. The most common methods used are level dollar and level percentage of payroll. Under the Level Dollar method, the Amortization Payment is one of a stream of payments, all equal, whose Actuarial Present Value is equal to the UAAL. Under the Level Percentage of Pay method, the Amortization Payment is one of a stream of increasing payments, whose Actuarial Present Value is equal to the UAAL. Under the Level Percentage of Pay method, the stream of payments increases at the rate at which total covered payroll of all active members is assumed to increase.
Amortization Payment	That portion of the plan contribution or ADC which is designed to pay interest on and to amortize the Unfunded Actuarial Accrued Liability.
Amortization Period	The period used in calculating the Amortization Payment.
Closed Amortization Period	A specific number of years that is reduced by one each year, and declines to zero with the passage of time. For example if the amortization period is initially set at 30 years, it is 29 years at the end of one year, 28 years at the end of two years, etc.
Employer Normal Cost	The portion of the Normal Cost to be paid by the employer. This is equal to the Normal Cost less expected member contributions.
Equivalent Single Amortization Period	For plans that do not establish separate amortization bases (separate components of the UAAL), this is the same as the Amortization Period. For plans that do establish separate amortization bases, this is the period over which the UAAL would be amortized if all amortization bases were combined upon the current UAAL payment.
Experience Gain/Loss	A measure of the difference between the normal cost rate from last year and the normal cost rate from this year.
Funded Ratio	The ratio of the Actuarial Value of Assets to the Actuarial Accrued Liability.
Funding Value of Assets	The value of the assets as of a given date, used by the actuary for valuation purposes. This may be the market or fair value of plan assets or a smoothed value in order to reduce the year-to-year volatility of calculated results, such as the funded ratio and the actuarially determined contribution (ADC). Also referred to as “Actuarial Value of Assets”, “Smoothed Market Value of Assets”, or “Valuation Assets”.
GASB	Governmental Accounting Standards Board.

**GASB No. 67 and
GASB No. 68**

These are the governmental accounting standards that set the accounting rules for public retirement systems and the employers that sponsor or contribute to them. Statement No. 68 sets the accounting rules for the employers that sponsor or contribute to public retirement systems, while Statement No. 67 sets the rules for the systems themselves.

Normal Cost

The annual cost assigned, under the Actuarial Cost Method, to the current plan year. Sometimes referred to as "Current Service Cost."

Open Amortization Period

An open amortization period is one which is used to determine the Amortization Payment but which does not change over time. In other words, if the initial period is set as 30 years, the same 30-year period is used in determining the Amortization Period each year. In theory, if an Open Amortization Period is used to amortize the Unfunded Actuarial Accrued Liability, the UAAL will never completely disappear, but will become smaller each year, either as a dollar amount or in relation to covered payroll.

**Unfunded Actuarial Accrued
Liability**

The difference between the Actuarial Accrued Liability and Actuarial Value of Assets. Sometimes referred to as "Unfunded Past Service Liability," "Unfunded Accrued Liability" or "Unfunded Supplemental Present Value."

Valuation Date

The date as of which the Actuarial Present Value of Future Benefits are determined. The benefits expected to be paid in the future are discounted to this date.

SECTION C

PENSION FUND INFORMATION

Statement of Total Plan Assets at Market Value

Item	September 30				
	2022				2021
	<u>Total</u>	<u>General & Ocean Rescue</u>	<u>Police Officers</u>	<u>Firefighters</u>	<u>Total</u>

L. Ratio of Funding Value to Market Value	92.3%	113.7%				

The Funding Value of Assets recognizes assumed investment income (line E3) fully each year. Differences between actual and assumed investment income (line E4) are phased-in over a closed 5-year period. During periods when investment performance exceeds the assumed rate, the Funding Value of Assets will tend to be less than Market Value. During periods when investment performance is less than the assumed rate, the Funding Value of Assets will tend to be greater than Market Value. If assumed rates are exactly realized for 4 consecutive years, it will become equal to Market Value.

F6. Total Phase-Ins	1,813,872	(2,521,298)	(2,509,764)	(2,116,439)	(1,877,691)	(3,938,340)
G. Funding Value End of Year						
G1. Preliminary Funding Value End of Year: A + D + E3 + F6	84,043,983	86,592,563				
G2. Upper Corridor Limit: 120%*B	108,926,581	91,380,395				
G3. Funding Value End of Year	84,043,983	86,592,563				
H. Difference between Market & Funding Value	6,728,168	(10,442,234)				
I. Funding Value Rate of Return	9.12%	3.63%				
J. Recognized Rate of Investment Expenses	0.28%	0.24%				
K. Market Value Rate of Return	20.43%	(15.37)%				
L. Ratio of Funding Value to Market Value	92.6%	113.7%				

The Funding Value of Assets recognizes assumed investment income (line E3) fully each year. Differences between actual and assumed investment income (line E4) are phased-in over a closed 5-year period. During periods when investment performance exceeds the assumed rate, the Funding Value of Assets will tend to be less than Market Value. During periods when investment performance is less than the assumed rate, the Funding Value of Assets will tend to be greater than Market Value. If assumed rates are exactly realized for 4 consecutive years, it will become equal to Market Value.

Investment Return

The approximate annual rates of investment return have been calculated on two bases and are shown below:

Year Ending September 30th	Investment Rate of Return	
	Market Value	Funding Value
1999	13.3	13.9
2000	16.5	20.0
2001	(6.1)	6.8
2002	(10.1)	(4.1)
2003	17.7	4.4
2004	10.5	4.9
2005	11.4	5.6
2006	7.9	8.4
2007	14.1	11.3
2008	(15.6)	4.2
2009	(1.6)	1.2
2010	8.2	3.1
2011	0.1	1.5
2012	15.3	1.3
2013	13.0	6.3
2014	7.2	7.7
2015	(4.1)	5.6
2016	7.6	7.1
2017	11.3	6.7
2018	7.4	5.7
2019	4.4	5.1
2020	5.6	6.8
2021	20.7	9.2
2022	(15.5)	3.7
Average Returns:		
Last 5 Years	3.8 %	6.1 %
Last 10 Years	5.3 %	6.4 %
All Years	5.3 %	6.0 %

Recent real investment return for the Retirement System has been:

General and Ocean Rescue						
Year Ended September 30						
	2022	2021	2020	2019	2018	Average for Period
Net Rate of Return	3.7 %	9.3 %	6.8 %	5.1 %	5.7 %	6.1 %
less inflation rate	8.2	5.4	1.4	1.7	2.3	3.8
Net Real Rate of Return	-4.5	3.9	5.4	3.4	3.4	2.3
Assumed Real Rate	4.4 %	4.6 %	4.6 %	4.7 %	4.8 %	4.6 %
Assumed Net Rate	6.6 %	6.8 %	7.1 %	7.2 %	7.3 %	7.0 %

Police Officers						
Year Ended September 30						
	2022	2021	2020	2019	2018	Average for Period
Net Rate of Return	3.7 %	9.2 %	6.7 %	5.1 %	5.8 %	6.1 %
less inflation rate	8.2	5.4	1.4	1.7	2.3	3.8
Net Real Rate of Return	-4.5	3.8	5.3	3.4	3.5	2.3
Assumed Real Rate	4.4 %	4.6 %	4.6 %	4.7 %	4.8 %	4.6 %
Assumed Net Rate	6.6 %	6.8 %	7.1 %	7.2 %	7.3 %	7.0 %

Firefighters						
Year Ended September 30						
	2022	2021	2020	2019	2018	Average for Period
Net Rate of Return	3.6 %	9.1 %	6.7 %	5.1 %	5.7 %	6.0 %
less inflation rate	8.2	5.4	1.4	1.7	2.3	3.8
Net Real Rate of Return	-4.6	3.7	5.3	3.4	3.4	2.2
Assumed Real Rate	4.4 %	4.6 %	4.6 %	4.7 %	4.8 %	4.6 %
Assumed Net Rate	6.6 %	6.8 %	7.1 %	7.2 %	7.3 %	7.0 %

The total investment return rate was computed using the approximate formula $i = I$ divided by $1/2 (A + B - I)$, where I is actual realized investment income plus market value adjustments, A is the beginning of year asset value, and B is the end of year asset value.

The preceding investment return rates reflect the particular characteristics of these Retirement Systems and should not be used to measure an investment advisor's performance or for comparison with other retirement systems. Such use will usually mislead.

SECTION F

SUMMARY OF PLAN PROVISION

Summary of Benefit Provisions

(September 30, 2022)

General/Ocean Rescue

NORMAL RETIREMENT:

Eligibility

Grandfathered and April 30, 2012 frozen accrued benefits.

General: 30 or more years of service, regardless of age; or, age 55 with 10 or more years of credited service.

Ocean Rescue: Age 50 with 10 or more years of service. Members with at least 10 years of credited service who retire after 2/9/93 are eligible when the individual's age plus credited service totals 65 years or more.

Plan benefits accrued after April 30, 2012.

General: Age 62 with 10 or more years of service. Members whose employment terminated prior to May 1, 2017 are eligible to retire or enter DROP at age 65 with 10 or more years of service.

Ocean Rescue: Age 62 with 10 or more years of service. Members whose employment terminated prior to May 1, 2017 are eligible to retire or enter DROP at age 65 with 10 or more years of service.

Pension Amount

Grandfathered and April 30, 2012 frozen accrued benefits.

General: Average final compensation times the sum of a) 2.75% for service earned after 9/30/90, to a maximum of 82.5%, plus 2.35% for service earned on or before 9/30/90 for the first 30 years of service, plus, b) 1.0% for service in excess of 30 years.

Ocean Rescue: Average final compensation times the sum of a) 2.85% for the first 25 years of service with a maximum of 71.25% of AFC, plus, b) 1.0% for service in excess of 25 years.

The normal form of pension is a pension payable for life. Also, see Automatic Death After Retirement Pension heading.

Plan benefits accrued after April 30, 2012.

Average final compensation multiplied by

- a) 1.25% per year of credited service between May 1, 2012 and April 30, 2017, plus
- b) 1.70% per year of credited service on and after May 1, 2017.

Type of Average Final Compensation

Grandfathered and April 30, 2012 frozen accrued benefits.

Highest 2 consecutive years within the member's last 5 years of credited service.

Plan benefits accrued after April 30, 2012.

Average final compensation after April 30, 2012 over a period increasing up to the final 5 years of credited service.

DROP RETIREMENT:

Eligibility - Same as Normal Retirement.

Pension Amount - Members that entered the DROP before May 1, 2012: 98% of the member's accrued benefit at the date of election to participate in DROP.

Members that entered the DROP after April 30, 2012: Except for grandfathered members, 100% of the member's accrued benefit at the date of election to participate in DROP.

Monthly Distributions - Monthly DROP payments are made to the retirement trust during DROP participation.

EARLY RETIREMENT (GENERAL):

Eligibility - Age 50 with 10 or more years of credited service. Frozen accrued benefits as of April 30, 2012 are vested immediately. Eligibility for benefits accrued after April 30, 2017 is age 60 with 10 or more years of credited service.

Pension Amount - Frozen accrued benefits are computed as a normal retirement benefit but reduced 6/10 of 1% (3/10 of 1% if service credit is 20 or more years) for each month early retirement precedes the member's projected normal retirement date. For plan benefits accrued after April 30, 2012 the Plan provides for an actuarially equivalent reduction.

DEFERRED RETIREMENT (VESTED TERMINATION BENEFIT):

Eligibility - 10 or more years of service. Pension begins upon meeting requirement for normal retirement. Contributions must be left on deposit in the System; failure to do so results in forfeiture of the vested benefit. Members are immediately vested in Plan A when reaching age 55 if employed on May 1, 2012.

Plan B members with service accrued after April 30, 2012 are eligible for normal retirement at age 65. Plan B members who are employed or participating in DROP on and after May 1, 2017 are eligible to retire at age 62.

Pension Amount - Computed as for normal retirement, based upon service and average final compensation at time of termination.

DUTY DISABILITY RETIREMENT:

Eligibility - No age or service requirements.

Pension Amount - Computed as a regular retirement with additional service credit granted from date of disability to earliest normal retirement eligibility date. Minimum benefit is 60% of average final compensation.

NON-DUTY DISABILITY BEFORE RETIREMENT:

Eligibility - 10 or more years of credited service.

Pension Amount - Computed as for normal retirement.

DUTY DEATH SPECIAL PROVISIONS:

Eligibility - Death while actually performing duty for the Town or as the natural and proximate result, independent of all other causes, of a personal injury or disease arising out of and in the course of the actual performance of duty for the town.

- a) 10-year service credit requirement is waived
- b) surviving children receive 25% of deceased member's AFC, not to exceed 75% of AFC when there are four or more surviving children.
- c) Surviving spouse receives difference between 75% of deceased member's AFC and aggregate amount paid surviving children.

NON-DUTY DEATH BEFORE RETIREMENT (ELECTIVE SURVIVOR PENSION):

Eligibility:

- (a) The member has elected a survivor beneficiary
- (b) The member dies while in the employ of town with at least 10 years of credited service, or the member was employed by the town and not participating in the DROP on May 1, 2012 and thereafter dies while in the employ of the town.
- (c) The member files a survivor beneficiary designation in writing with Human Resources Department.

Pension Survivorship Amount: computed as if the deceased member had elected optional form of payment 100% survivorship payment.

AUTOMATIC DEATH AFTER RETIREMENT PENSION:

Grandfathered and April 30, 2012 frozen accrued benefits.

To Surviving Child(ren): 25% of the retirant's pension payable to age 18, not to exceed an equal share of 75% of the retirant's pension. Payments to surviving children may be paid to age 25 if no spouse benefits are payable. Deceased retirant payment is unreduced for an initial 10-year period from the retirant's retirement date. Subsequent payments are based on 75% from the end of this 10-year period until termination of applicable surviving child(ren) or spousal payment.

To Surviving Spouse: The difference, if any, between 75% of the deceased retirant’s pension and the aggregate amount paid to any surviving children for the month. Payment is unreduced for an initial 10-year period from the retirant’s retirement date. Subsequent payments are made until the later of death of surviving spouse or termination of child payments.

Plan benefits accrued after April 30, 2012.

Reduced optional forms of payment are available based on actuarial equivalency.

POST-RETIREMENT COST-OF-LIVING ADJUSTMENTS:

Grandfathered and April 30, 2012 frozen accrued benefits.

Members who retire after 9/30/68 and prior to 10/1/90 receive an annual 1.0% increase computed on the base benefit. Other adjustments have been made periodically. Pensions effective after 9/30/90 will be increased 2.0% annually based on the total pension payable subsequent to an initial 3-year deferral period.

Plan benefits accrued after April 30, 2012.

None.

MEMBER CONTRIBUTIONS:

Benefit Group	Contribution Rate as a Percent-of-Payroll			
	Before May 1, 2012	On and After May 1, 2012	On and After October 1, 2013	On and After April 30, 2017
General –				
Hired Before May 1, 1992	6.47%	4.47%	2.47%	3.50%
Hired on or After May 1, 1992	6.47%	2.47%	2.47%	3.50%
Lifeguard –				
Hired Before May 1, 1992	7.21%	5.21%	2.47%	3.50%
Hired on or After May 1, 1992	7.21%	3.21%	2.47%	3.50%

Grandfathered General employees continue to contribute 6.47% of pay.

TOWN CONTRIBUTIONS: Actuarially determined amounts which together with member contributions are sufficient to cover the requirements of the funding objective stated in the Executive Summary.

PRIOR GOVERNMENTAL SERVICE: The years or fractional parts of years that a member previously served for any other municipal, county, or state government or district may be added to years or fractional parts of years of credited service provided that the member contributes the sum that would have been contributed to the retirement plan to pay the full actuarial cost.

Summary of Benefit Provisions

(September 30, 2022)

Police

NORMAL RETIREMENT:

Eligibility

Grandfathered and April 30, 2012 frozen accrued benefits.

20 or more years of service, regardless of age; or, age 50 with 10 or more years of credited service; or, members with at least 10 years of credited service who retire after 9/30/90 are eligible when the individual's age plus credited service totals 65 years or more.

Plan benefits accrued after April 30, 2012.

Members whose employment terminated on or after October 1, 2019 are eligible to retire or enter the DROP at the earlier of Age 55 with 10 or more years of service or Age 52 with 25 or more years of service.

Members whose employment terminated prior to October 1, 2019 and after September 30, 2016 are eligible to retire or enter the DROP at age 56 with 10 or more years of service.

Members whose employment terminated prior to October 1, 2016 are eligible to retire or enter the DROP at age 65 with 10 or more years of service.

Pension Amount

Grandfathered and April 30, 2012 frozen accrued benefits.

Average final compensation multiplied by the greater of:

- a) 3.5% per year of credited service to a maximum of 25 years, or
- b) 2.0% per year of credited service to a maximum of 50 years.

The normal form of pension is a pension payable for 10 years certain. Also, see Automatic Death after Retirement heading.

Plan benefits accrued after April 30, 2012.

Average final compensation multiplied by:

- a) 1.25% per year of credited service between May 1, 2012 and September 30, 2016, plus
- b) 2.75% per year of credited service on and after October 1, 2016.

Average Final Compensation

Grandfathered and April 30, 2012 frozen accrued benefits.

Highest 2 consecutive years within the member's last 5 years of credited service.

Plan benefits accrued after April 30, 2012.

Average final compensation after April 30, 2012 over a period increasing up to the final 5 years of credited service.

DROP RETIREMENT:

Eligibility - Same as Normal Retirement.

Pension Amount - 100% of the member's accrued benefit at the date of election to participate in DROP.

Monthly Distributions - Monthly DROP payments are made to the retirement trust during DROP participation.

DEFERRED RETIREMENT (VESTED TERMINATION BENEFIT):

Eligibility - 10 or more years of credited service. Pension begins upon meeting requirement for normal retirement. Contributions must be left on deposit in the System; failure to do so results in forfeiture of the vested benefit. Frozen accrued benefits as of April 30, 2012 are vested immediately. Members employed with the Town on May 1, 2012 are eligible to retire from Plan A when reaching age 50, notwithstanding total service. Members with accrued service on and after May 1, 2012 are eligible to retire from Plan B upon satisfying Normal Retirement eligibility requirements under plan B.

Pension Amount - Computed as for normal retirement, based upon service and average final compensation at time of termination.

DUTY DISABILITY RETIREMENT:

Eligibility - No age or service requirements.

Pension Amount - Computed as a regular retirement with additional service credit granted from date of disability to earliest normal retirement eligibility date. Minimum benefit is 60% of average final compensation.

NON-DUTY DISABILITY BEFORE RETIREMENT:

Eligibility - 10 or more years of credited service.

Pension Amount - Computed as for normal retirement.

DUTY DEATH SPECIAL PROVISIONS:

Eligibility - Death while actually performing duty for the Town or as the natural and proximate result, independent of all other causes, of a personal injury or disease arising out of and in the course of the actual performance of duty for the town.

(a) 10-year service credit requirement is waived

(b) surviving children receive 25% of deceased member's AFC, not to exceed 75% of AFC when there are four or more surviving children.

(c) Surviving spouse receives difference between 75% of deceased member's AFC and aggregate amount paid surviving children.

NON-DUTY DEATH BEFORE RETIREMENT (ELECTIVE SURVIVOR PENSION):

Eligibility:

- (a) The member has elected a survivor beneficiary
- (b) The member dies while in the employ of town with at least 10 years of credited service, or the member was employed by the town and not participating in the DROP on May 1, 2012 and thereafter dies while in the employ of the town.
- (c) The member files a survivor beneficiary designation in writing with Human Resources Department.

Pension Survivorship Amount: computed as if the deceased member had elected optional form of payment 100% survivorship payment.

AUTOMATIC DEATH AFTER RETIREMENT PENSION:

Grandfathered and April 30, 2012 frozen accrued benefits.

To Surviving Child(ren): 25% of the retirant's pension payable to age 18, not to exceed an equal share of 75% of the retirant's pension. Payments to surviving children may be paid to age 25 if no spouse benefits are payable. Payment to dependent children and spouse is an unreduced payment for an initial 10-year period from retirant's retirement date. Subsequent payments are based on 75% from the end of this 10-year period until termination of child(ren) and surviving spouse payment.

To Surviving Spouse: The difference, if any, between 75% of the deceased retirant's pension and the aggregate amount paid to any surviving children for the month. Payment to surviving spouse is an unreduced payment for an initial 10-year period from retirant's retirement date. Subsequent payments are based on 75% from the end of this 10-year period until death of surviving spouse.

Plan benefits accrued after April 30, 2012.

Reduced optional forms of payment are available.

POST-RETIREMENT COST-OF-LIVING ADJUSTMENTS:

Grandfathered and April 30, 2012 frozen accrued benefits.

Members who retire after 9/30/68 and prior to 10/1/90 receive an annual 1.0% increase computed on the base benefit. Other adjustments have been made periodically. Pensions effective after 9/30/90 will be increased 2.0% annually based on the total pension payable subsequent to an initial 3 year deferral period.

Plan benefits accrued after April 30, 2012.

None.

MEMBER CONTRIBUTIONS:

Benefit Group	Contribution Rate as a Percent-of-Payroll				
	Before May 1, 2012	On and After May 1, 2012	On and After October 1, 2013	On and After October 1, 2016	On and After October 1, 2019
Police Officers	6.98%	4.98%	2.47%	10.00%*	8.50%

*The member contribution rates for plan years beginning on and after October 1, 2017 and prior to October 1, 2019 were subject to adjustment based on the assumed investment return and the actual rate of investment return for the plan year ending on the valuation date, net of investment expenses, and such that the ratio of employer to member contributions for the plan year ending on the valuation date is maintained for the plan year following the adjustment; subject in any event to a minimum member contribution rate of 8% and a maximum member contribution rate of 12% of compensation.

PREMIUM TAX MONIES:

No future State contributions are expected.

TOWN CONTRIBUTIONS:

Actuarially determined amounts which together with member contributions are sufficient to cover the requirements of the funding objective stated in the Executive Summary.

PRIOR GOVERNMENTAL SERVICE ELSEWHERE:

During the first five years of employment by the Town, the years or fractional parts of years that a member previously served for any other municipal, county, or state government or district as a Police Officer may be added to years or fractional parts of years of credited service provided that the member contributes the sum that would have been contributed to the retirement plan to pay the full actuarial cost.

PURCHASE OF SERVICE CREDIT:

A vested member-Police Officer who has not purchased service credit under Prior Governmental Service elsewhere may purchase years or fractional parts of years of service based upon actual prior service as a Police Officer to be added to years of credited service provided that the member contributes the sum that would have been contributed to the retirement plan to pay the full actuarial cost.

Summary of Benefit Provisions

(September 30, 2022)

Fire
